## Disclaimer

GS1®, under its IP Policy, seeks to avoid uncertainty regarding intellectual property claims by requiring the participants in the Work Group that developed this **Invoice Business Message Standard (BMS)** to agree to grant to GS1 members a royalty-free licence or a RAND licence to Necessary Claims, as that term is defined in the GS1 IP Policy. Furthermore, attention is drawn to the possibility that an implementation of one or more features of this Specification may be the subject of a patent or other intellectual property right that does not involve a Necessary Claim. Any such patent or other intellectual property right is not subject to the licencing obligations of GS1. Moreover, the agreement to grant licences provided under the GS1 IP Policy does not include IP rights and any claims of third parties who were not participants in the Work Group.

Accordingly, GS1 recommends that any organization developing an implementation designed to be in conformance with this Specification should determine whether there are any patents that may encompass a specific implementation that the organisation is developing in compliance with the Specification and whether a licence under a patent or other intellectual

property right is needed. Such a determination of a need for licencing should be made in view of the details of the specific system designed by the organisation in consultation with their own patent counsel.

# 1 Business Domain View

## 1.1 Introduction

### Message Definition

The Invoice message is sent by the supplier to the customer claiming payment for goods or services supplied under conditions agreed by the seller and the buyer.

### Principles

The seller may invoice for one or more transactions referring to goods and services related to one or more order, delivery instruction, call off, etc. The invoice may contain references to payment terms, transport details and additional information for customs or statistical purposes in the case of cross-border transaction.

The same message with correct data qualification also covers the functions of proforma invoice, debit and credit note. Furthermore, the Invoice message may be applied in a self-billing scenario, where the buyer will send the invoice.

# 3 Business Transaction View

## 3.1 Business Process

The diagram below illustrates the parties and the roles they (can) play in the invoicing and payment processes.

- Amongst others, the invoice transaction sets the preconditions for the payment process. Therefore the invoice also contains information about the parties that will become active during the payment process, i.e. the payer and the payee.
- Furthermore there might be a third party involved, such as a factor.

### Invoice Credit Note

This is an example of an Invoice message used as a Credit Note.

#### Party Information

GS1 Global Location Number	Party Type
5412345000013	Buyer
4098765000010	Seller

The Invoice (Credit Note) identification number is CN11-038 and the message was sent on April 15<sup>th</sup> 2011 at 10.20 AM. The goods were delivered on April 11<sup>th</sup> 2011, based on the Order # PO3352, placed on the 11<sup>th</sup> of March 2011 at 11.00 AM.

The credit note is sent by the Seller (GLN 4098765000010) to the Buyer (5412345000013).

The Credit Note refers the Receiving Advice RA20051 created on April 13 2011.

The Credit Note refers to Invoice IN11-548 created on April 12 2011.

The reason why the credit note has been raised is that part of the goods delivered were damaged. This was announced in the Receiving Advice.

## 7 Summary of Changes

Any change in the GS1 standards is done based on the Work Request (WR) submitted by the GS1 User Companies or Member Organisations. All Work Requests are documented in the Work Request system available on the GS1 website: <http://wr.gs1.org>. The system is accessible to registered users. New visitors need to register first, to be able to access it. WRs can be searched by the number referenced in tables below, see: Search Work Requests. The number starts with the two last digits of the year when it was submitted, followed by the consecutive number within that year.

**Note:** WRs submitted earlier than February 2012 should be searched in Old Change Requests.
