3. Message structure chart.....	7
4. Branching diagram	8
5. Segment Descriptions	11
6. Segments layout.....	13
7. EANCOM-Segments layout	38
8. Example(s)	63

1. Introduction

Preamble

The aim of the brochure on hand is to offer documentation describing the exchange of sales data between business partners.

The basis of this elaboration is the international standard EANCOM® 2002. The message type SLSRPT 006 is used to transmit relevant data. GEFEG.FX (Gefeg mbH, Berlin) was used as the documentation tool.

Please be aware to know that this booklet does not replace the complete specifications in the original chapters or other relevant instructions within the EANCOM® 2002 documentation. Instead, it deals with the description of segments, data elements and codes to be used for a specific task.

The current documentation has been produced by the GS1 Germany GmbH in Cologne. GS1 Germany assumes no liability for any damages incurring from the use of this documentation. This brochure or extracts thereof may only be published or forwarded to third parties with the express written consent of GS1 Germany, which holds copyright on this work.

GS1 Germany thanks all experts who contributed significantly to these guidelines with knowledge from their daily business.

Important note:

To fulfill the requirements of directive 2003/58/EG, article 4, C058 has been opened in NAD segments identifying a message sender. If the place in the 5 DE 3124 is not sufficient, the following RFF segments can be used, qualified with DE 1153 = GN. DE 1154 has got a capacity of 70 digits. Only in those cases, when no RFF segment follows NAD, a RFF+GN can be used in the heading section of the message. Within the EDI recommendations of GS1 Germany this is only applicable for the messages REMADV and SLSFCT.

1. Introduction

Conventions

This brochure offers different ways to start:

Section 2, "Business Terms", is a table which links directly to the sequence numbers of the segments.

Section 3, "Message Structure Chart", is a list of all used segments in the same sequence as they are defined in the EANCOM® message. In general, for each piece of information one single segment is provided. Exceptions may arise when the occurrence of a segment is limited and can contain alternative information (e.g., segment BGM).

Section 4, "Branching Diagram", is a hierarchical graphic depiction of all used segments in the same sequence as they are defined in the EANCOM® message. However, every segment is shown only once, and it is therefore possible that the sequence numbering is interrupted.

Section 5, "Segments Description", is a brief summary of the use of each segment.

In **Section 6, "Segments Layout"**, an illustration that has been chosen to match the business terms (data from the inhouse application) with the elements from the EANCOM® syntax.

In **Section 7, "EANCOM® Segments Layout"**, the message is presented in a similar layout as in the EANCOM® manual.

Note on sections 6 and 7:

An additional column (GER) to provide a German status has been added to the layouts. An entry indicates that the recommended status differs from the EANCOM® status. If the recommended status is weaker than the EANCOM® status, the data element (or, if only one term exists the entire segment) can be omitted.

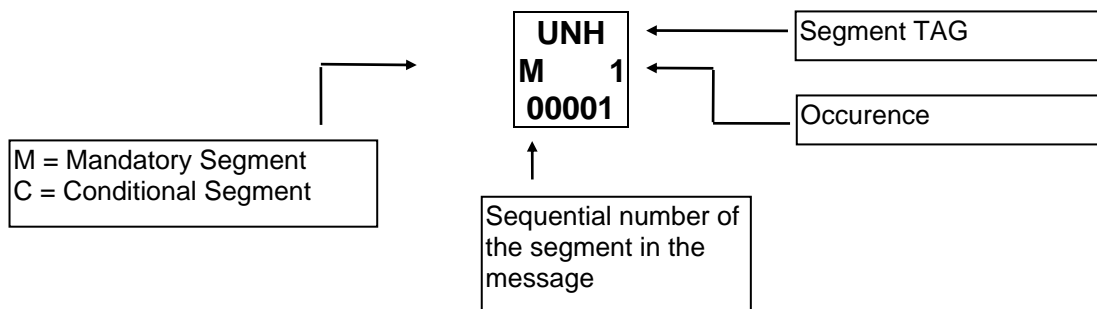

In general, code names are presented in red; these must to be understood as restricted and should not be changed/modified without bilateral agreement with the partner. If codes are given as examples, they are represented in blue (e.g., measurements). In this case, all codes of the relevant code list can be used.

Section 8, "Example(s)", provides at least one message example with comments.

Please note that, for technical reasons, the examples can contain component data element separators, which would otherwise be represented as data element separators in the original messages.

1. Introduction

The following conventions apply to this brochure:

Business Term			EANCOM-Mapping		
Name	Format	Status	DEG	DE	Description
a	alphabetic character				Data element
n	numeric character				Data element
an	alphanumeric character				Data element
a3	3 alphabetic characters, fixed length				Data element group
n3	3 numeric characters, fixed length				Data element group
an3	3 alphanumeric characters, fixed length				Data element group
a..3	up to 3 alphabetic characters				Data element group
n..3	up to 3 numeric characters				Data element group
an..3	up to 3 alphanumeric characters				Data element group
			C	=	Conditional
			M	=	Mandatory
			R	=	Required
			D	=	Depending
			O	=	Optional
			A	=	Recommended
			N	=	Not used

1. Introduction

Message structure

Heading section

Specification of message sender and receiver as well as reporting period.

Detail section

Specification of locations (GLN) and GTIN to identify goods. Specification of quantities is mandatory, amounts conditional.

Summary section

The summary section contains no data and has syntactical reasons.

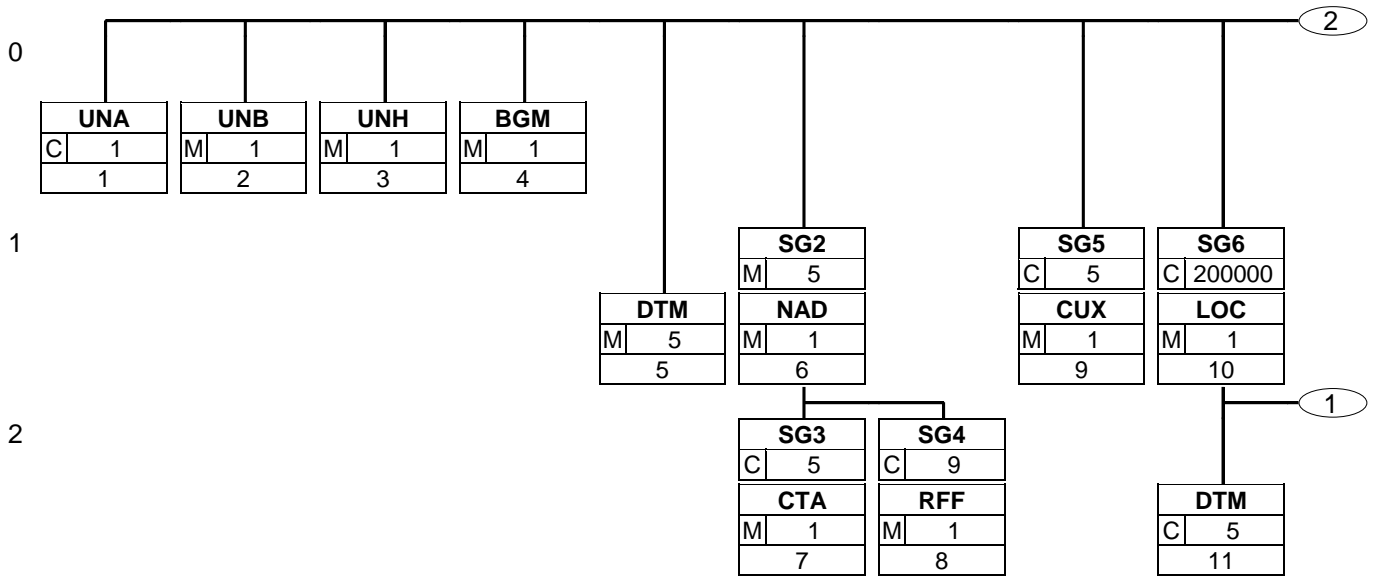

2. Business Terms

4. Branching Diagram

4. Branching Diagram

5. Segments Description

UNA - C 1 - **Used character set**
The use of the UNA segment is mandatory, if character set "A" (UNB,DE0001) is not used.

UNB - M 1 - **Beginning of transmission file**
This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange.

Heading section

UNH - M 1 - **Beginning of message**
This segment is used to head, identify and specify a message.

BGM - M 1 - **Document number**
This segment is used to indicate the type and function of a message and to transmit the identifying number.

DTM - M 5 - **Creation date**
Identification of the 'Document/message date/time' (code value 137) is mandatory in the invoice message.

DTM - M 5 - **Reporting period, start**
DTM segment is used to specify date, and/or time, or period.

DTM - M 5 - **Reporting period, end**
DTM segment is used to specify date, and/or time, or period.

DTM - M 5 - **Reporting period, textile**
DTM segment is used to specify date, and/or time, or period.
This segment can be used alternatively (!) to the 2 previous segments.

SG2 - M 5 - **NAD**

NAD - M 1 - **Identification of supplier/receiver**
The supplier/message receiver is identified by GLN.

SG2 - M 5 - **NAD-SG4**

NAD - M 1 - **Identification of buyer/sender**
The buyer/message sender is identified by GLN.

SG4 - C 9 - **RFF**

RFF - M 1 - **Statements on business letters**
This RFF segment may only be used if the preceding NAD has not enough space to fulfill the requirements of directive 2003/58/EG, article 4.

SG5 - C 5 - **CUX**

CUX - M 1 - **Currency**
When specifying Reference and Target Currencies for international trade, one occurrence of CUX is all that is required. The reference currency is identified in the first occurrence of composite C504, with the target currency specified in the second occurrence of C504. The rate of exchange between the two is detailed in DE 5402.

Detail section

SG6 - C 200000 - **LOC-DTM-SG8**

LOC - M 1 - **Identification of location of sale**
The LOC segment triggers the detail section of the message. Segment group 6 is repeated for every location where sales are reported.
The outlet for which sales data are reported is identified by GLN.

5. Segments Description

- DTM - C 5** - **Sales period outlet**
 The segment is used to provide a date or period when goods have been sold, which are identified in the following LIN group (segment group 8). The DTM segment can be used to specify the weekly sales in a monthly report.
 This segment is not necessary if the date or period is identical with the specification at header level.
- SG8 - C 200000** - **LIN-MOA-SG9-SG10-SG10**
- LIN - M 1** - **GTIN- Article identification**
 In this segment the GTIN is indicated as item identification.
- MOA - C 5** - **Monetary amount line level, textile**
 To indicate the retail value of the current article within the specified period code value 402 is used for DE 5025 and AAE is used for DE 5125 of the following PRI segment.
- SG9 - C 999** - **PRI**
- PRI - M 1** - **Retail price**
 This segment is used to provide the price by which the current article was sold.
- SG10 - C 999** - **QTY**
- QTY - M 1** - **Sold quantity**
 The QTY segment is used to specify the sold quantity for the current item, which was identified in the LIN segment.
- SG10 - C 999** - **QTY**
- QTY - M 1** - **Returned by consumer**
 The QTY segment is used to specify the quantity by the consumer for the current item, which was identified in the LIN segment.

Summary section

- UNS - M 1** - **Section control**
 This segment is used to identify the break between the message detail and message trailer sections.
- UNT - M 1** - **End of message**
 This segment is mandatory in UN/EDIFACT. It must always be the last segment in the message.
- UNZ - M 1** - **End of the transmission file**
 The UNZ segment is the last segment of the transmission file.

6. Segments Layout

Segment number: 1

UNA - C 1 - Service string advice					
Description: To define the characters selected for use as delimiters and indicators in the rest of the interchange that follows.					
Business Term	DE	EDIFACT	EAN *	GER	Description
Component data element separator	UNA1	M an1	M		Default value: ":"
Data element separator	UNA2	M an1	M		Default value: "+"
Decimal notation	UNA3	M an1	M		Default value: "."
Release character	UNA4	M an1	M		Default value: "?"
Reserved for future use	UNA5	M an1	M		(Default value: space)
Segment terminator	UNA6	M an1	M		Default value: "' '
Segment notes: The use of the UNA segment is mandatory, if character set "A" (UNB,DE0001) is not used. For international EDI the use of character set UNOA is recommended. For national (German) EDI the use of UNOC is reasonable because it contains lower case letters and umlauts. Example: UNA:+.? ' The UNA segment contains the default service string characters.					

6. Segments Layout

Segment number: 2

UNB - M 1 - Interchange header						
Description: To start, identify and specify an interchange.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
	S001	M	M			
Character set	0001	M a4	M			UNOA = UN/ECE level A UNOB = UN/ECE level B UNOC = UN/ECE level C UNOD = UN/ECE level D UNOE = UN/ECE level E UNOF = UN/ECE level F
Syntax version	0002	M n1	M			3 = Version 3
	S002	M	M			
Identification of the sender of the transmission file	0004	M an..35	M			= Global Location Number (GLN)

File creation date	0017	M n6	M			= Dateformat JJMMTT
File creation time	0019	M n4	M			= Timeformat HHMM
Interchange control reference, beginnig	0020	M an..14	M			= Unique senders reference
	S005	C	O			
Password interchange	0022	M an..14	M			
	0025	C an2	O			AA = Reference BB = Password
Application reference	0026	C an..14	O			Message type if the transmission fole contains only one message type
	0029	C a1	O			A = Highest priority
Acknowledgement request	0031	C n1	O			
EANCOM	0032	C an..35	O		R	= EANCOM... EDIFACT subset identification (see note)
Test indicator	0035	C n1	O			1 = Interchange is a test
Segment notes:						
<p>This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange.</p> <p>For international EDI the use of character set UNOA is recommended. For national (German) EDI the use of UNOC is reasonable because it contains lower case letters and umlauts.</p>						
Note DE 0008:						

6. Segments Layout

Segment number: 2

The address for reverse routing is provided by the interchange sender to inform the interchange recipient of the address within the sender's (source) system to which responding interchanges must be sent. It is recommended that the GLN be used for this purpose.

Note DE 0014:

The routing address is used to identify the receiver, if a provider adds service values for the actual receiver (e.g. consolidated companies, corporate group). The use of the identification system (e.g. GLN) has to be agreed bilaterally.

Note DE 0020:

This data element must contain a consistent sequential number per interchange between sender and receiver of the transmission.

Note DE 0032: This data element is used to identify any underlying agreements which control the exchange of data. Within EANCOM, the identity of such agreements must start with the letters 'EANCOM', the remaining characters within the data element being filled according to bilateral agreements.

Example:

```
0 UNB+UNOC:3+4012345000009:14:4012345000018+4000004000002:14:4000004000099+101013:1  
43+4711+REF:AA++++EANCOM+1'  
The EANCOM file 4711 dated 13.10.2010, 10 h 43 is sent by the issuer identified with GLN  
4012345000009 to the receiver identified with GLN 4000004000002.
```

6. Segments Layout

Heading section

Segment number: 3

UNH - M 1 - Message header						
Description: To head, identify and specify a message.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
Message reference number	0062	M an..14	M			Sender's unique message reference. Sequence number of messages in the interchange. DE 0062 in UNT will have the same value. Generated by the sender.
	S009	M	M			
	0065	M an..6	M	*		SLSRPT = Sales data report message
	0052	M an..3	M	*		D = Draft version/UN/EDIFACT Directory
	0054	M an..3	M	*		01B = Release 2001 - B
	0051	M an..2	M	*		UN = UN/CEFACT
	0057	C an..6	R	*		EAN007 = GS1 version control number (GS1 Code)
Segment notes: Segmentstatus: Mandatory						
This segment is used to head, identify and specify a message. The Association assigned code was increased by 1 because the UNS segment was added.						
Example: UNH+ME000001+SLSRPT:D:01B:UN:EAN007' The reference number of the SLSRPT message is ME000001.						

6. Segments Layout

Heading section

Segment number: 4

BGM - M 1 - Beginning of message						
Description: To indicate the type and function of a message and to transmit the identifying number.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
	C002	C	R			
	1001	C an..3	R	*		73E = Sales data report (GS1 Code)
	1131	C an..17	N			
	3055	C an..3	R	*		9 = GS1
Process variant, coded	1000	C an..35	O			This data element indicates the variante of the process model textile: ../04-2-2.pdf
	C106	C	R			
Document Number	1004	C an..35	R			Document number assigned by sender
	1225	C an..3	R	*		1 = Cancellation 2 = Addition 5 = Replace 6 = Confirmation 9 = Original 31 = Copy In the textile sector only code value 1 or 9 are used.
Segment notes: Segmentstatus: Mandatory						
This segment is used to indicate the type and function of a message and to transmit the identifying number. The use of DE 1000 must be mutually agreed between the data exchanging parties.						
Example: BGM+73E::9:X+87441+9' The document number is 87441.						

6. Segments Layout

Heading section

Segment number: 5

SG2	- M	5 - NAD-SG3-SG4
SG3	- C	5 - CTA
CTA	- M	1 - Contact information

Description:

To identify a person or a department to whom communication should be directed.

Business Term	DE	EDIFACT	EAN	*	GER	Description
	3139	C an..3	R			PD = Purchasing contact
	C056	C	O			
	3413	C an..17	O			
Contact person at corporate office	3412	C an..35	O			

Segment notes:

Segmentstatus: Conditional

This segment is used to identify the department and/or person within the party specified in the NAD. The GLN is particularly suitable for that purpose.

Example: CTA+PD+:R.Waldorf'

Purchasing contact person is Mr. Waldorf.

6. Segments Layout

Heading section

Segment number: 13

SG2	- M	5 - NAD-SG3-SG4				
SG4	- C	9 - RFF				
RFF	- M	1 - Reference				
Description: To specify a reference.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
	C506	M	M			
	1153	M an..3	M			IT = Internal customer number
Internal customer number of corporate office	1154	C an..70	R			
Segment notes: Segmentstatus: Conditional						
The RFF segment following the NAD segment can specify the customer number of suppliers system.						
If no functional or organisational differences are necessary within one company only the GLN is used for communication purposes, if applicable the receiver links within the inhouse system. Additional identifications should be agreed only in those cases when different functional entities need to be distinguished at one location.						
Example: RFF+IT:1515-234-4' The internal customer number of the sender is 1515-234-4 in the receivers system.						

6. Segments Layout

Heading section

Segment number: 14

SG5	- C	5 - CUX				
CUX	- M	1 - Currencies				
Description: To specify currencies used in the transaction and relevant details for the rate of exchange.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
	C504	C	R			
	6347	M an..3	M	*		2 = Reference currency
Currency	6345	C an..3	R			ISO 4217 three alpha EUR = Euro
	6343	C an..3	R			11 = Payment currency
	C504	C	D			
	6347	M an..3	M	*		3 = Target currency
	6345	C an..3	R			ISO 4217 three alpha
	6343	C an..3	R			11 = Payment currency
	6348	C n..4	O			
Rate of exchange	5402	C n..12	D			
Segment notes: Segmentstatus: Depending, must only be used if prices or amounts are content of the message. When specifying Reference and Target Currencies for international trade, one occurrence of CUX is all that is required. The reference currency is identified in the first occurrence of composite C504, with the target currency specified in the second occurrence of C504. The rate of exchange between the two is detailed in DE 5402. Example: CUX+2:EUR:11+3:USD:11+0.90243' The basic currency is EURO.

Segment number: 15

SG6	- C	200000	- LOC-DTM-SG8
LOC	- M	1	- Place/location identification
Description: To identify a place or a location and/or related locations.			
Business Term	DE	EDIFACT	EAN * GER Description
	3227	M an..3	M 162 = Place or location of sale
	C517	C	A
Identification of location of sale	3225	C an..25	A Global Location Number (GLN)- Format n13
	1131	C an..17	O
	3055	C an..3	D 9 = GS1
Segment notes: Segmentstatus: Mandatory The LOC segment triggers the detail section of the message. Segment group 6 is repeated for every location where sales are reported. The outlet for which sales data are reported is identified by GLN. Example: LOC+162+5099104000221::9' The outlet is identified by GLN 5099104000221.			

6. Segments Layout

Detail section

Segment number: 16

SG6	- C	200000	- LOC-DTM-SG8			
DTM	- C	5	- Date/time/period			
Description:						
To specify date, and/or time, or period.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
	C507	M	M			
	2005	M an..3	M	*		356 = Sales date, and or time, and or period
Sales period outlet	2380	C an..35	R			
	2379	C an..3	R			102 = CCYYMMDD 203 = CCYYMMDDHHMM 718 = CCYYMMDD-CCYYMMDD Format of period to be given in actual message without hyphen.
Segment notes:						
Segmentstatus: Conditional						
The segment is used to provide a date or period when goods have been sold, which are identified in the following LIN group (segment group 8). The DTM segment can be used to specify the weekly sales in a monthly report. This segment is not necessary if the date or period is identical with the specification at header level.						
Example: DTM+356:20030601:102' The date of sale is 01.06.2003.

	6063	M an..3	M * 210 = Returned by consumer quantity
Quantity returned by consumer	6060	M an..35	M Use only numeric values.
	6411	C an..3	D KGM = kilogram KWT = kilowatt For more code see EANCOM codeslist.
Segment notes: Segmentstatus: Mandatory			
The QTY segment is used to specify the quantity by the consumer for the current item, which was identified in the LIN segment.			
DE 6411 is only used, if the article is a variable quantity article. Default value is piece.			
Example: QTY+210:2' The quantity returned by the consumer is 2.			

6. Segments Layout

End of message

Segment number: 22

UNS - M 1 - Section control						
Description: To separate header, detail and summary sections of a message.						
Notes: 1. To be used by message designers when required to avoid ambiguities. Mandatory only if specified for the type of message concerned.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
	0081	M a1	M			S = Detail/summary section separation
Segment notes: Segmentstatus: Mandatory This segment is used to identify the break between the message detail and message trailer sections. Example: UNS+S' Separation of detail- and summary section						

6. Segments Layout

End of message

Segment number: 23

UNT - M 1 - Message trailer						
Description: To end and check the completeness of a message.						
Business Term	DE	EDIFACT	EAN	*	GER	Description
Number of segments within the message	0074	M n..6	M			
	0062	M an..14	M			The message reference numbered detailed here must equal the one specified in DE 0062 of the UNH segment.
Segment notes: Segmentstatus: Mandatory This segment is mandatory in UN/EDIFACT. It must always be the last segment in the message. Example: UNT+35+ME000001' The message contains 35 segments						

6. Segments Layout

Segment number: 24

UNZ - M 1 - Interchange trailer					
Description: To end and check the completeness of an interchange.					
Business Term	DE	EDIFACT	EAN *	GER	Description
End of the transmission file, Number of messages or message groups	0036	M n..6	M		Number of messages or message groups in the transmission file.
Interchange control reference, end	0020	M an..14	M		Interchange control reference, identical with UNB DE 0020.
Segment notes: The UNZ segment is the last segment of the transmission file. Note DE 0036: If functional groups are not used, this is the number of messages within the interchange. Example: UNZ+1+4711' The transmission file contains 1 message.					

7. EANCOM® Segments Layout

Segment number: 1

UNA - C 1 - Service string advice		EDIFACT	EAN	*	GER	Description:
Description: To define the characters selected for use as delimiters and indicators in the rest of the interchange that follows.						
UNA1	Component data element separator	M an1	M			Component data element separator Default value: ":"
UNA2	Data element separator	M an1	M			Data element separator Default value: "+"
UNA3	Decimal notation	M an1	M			Decimal notation Default value: "."
UNA4	Release indicator	M an1	M			Release character Default value: "?"
UNA5	Reserved for future use	M an1	M			Reserved for future use (Default value: space)
UNA6	Segment terminator	M an1	M			Segment terminator Default value: "' "
Segment notes: The use of the UNA segment is mandatory, if character set "A" (UNB,DE0001) is not used. For international EDI the use of character set UNOA is recommended. For national (German) EDI the use of UNOC is reasonable because it contains lower case letters and umlauts. Example: UNA:+.? ' The UNA segment contains the default service string characters.						

7. EANCOM® Segments Layout

Segment number: 2

UNB - M 1 - Interchange header						
Description: To start, identify and specify an interchange.						
		EDIFACT	EAN	*	GER	Description:
S001	SYNTAX IDENTIFIER	M	M			
0001	Syntax identifier	M a4	M			Character set UNOA = UN/ECE level A UNOB = UN/ECE level B UNOC = UN/ECE level C UNOD = UN/ECE level D UNOE = UN/ECE level E UNOF = UN/ECE level F
0002	Syntax version number	M n1	M			Syntax version 3 = Version 3
S002	INTERCHANGE SENDER	M	M			
0004	Sender identification	M an..35	M			Identification of the sender of the transmission file = Global Location Number (GLN)
0007	Partner identification code qualifier	C an..4	R			14 = GS1
0008	Address for reverse routing	C an..14	O			Address for reverse routing See note
S003	INTERCHANGE RECIPIENT	M	M			
0010	Recipient identification	M an..35	M			Identification of the receiver of the transmission file = Global Location Number (GLN)
0007	Partner identification code qualifier	C an..4	R			14 = GS1
0014	Routing address	C an..14	O			Routing address See note
S004	DATE/TIME OF PREPARATION	M	M			
0017	Date of preparation	M n6	M			File creation date = Dateformat JJMMTT
0019	Time of preparation	M n4	M			File creation time = Timeformat HHMM
0020	Interchange control reference	M an..14	M			Interchange control reference, beginnig = Unique senders reference
S005	RECIPIENT'S REFERENCE, PASSWORD	C	O			
0022	Recipient's reference/ password	M an..14	M			Password interchange
0025	Recipient's reference/ password qualifier	C an2	O			AA = Reference BB = Password
0026	Application reference	C an..14	O			Application reference Message type if the transmission fole contains only one message type
0029	Processing priority code	C a1	O			A = Highest priority

7. EANCOM® Segments Layout

Segment number: 2

		EDIFACT	EAN	*	GER	Description:
0031	Acknowledgement request	C n1	O			Acknowledgement request
0032	Communications agreement ID	C an..35	O		R	EANCOM = EANCOM... EDIFACT subset identification (see note)
0035	Test indicator	C n1	O			Test indicator 1 = Interchange is a test

Segment notes:

This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange.

For international EDI the use of character set UNOA is recommended. For national (German) EDI the use of UNOC is reasonable because it contains lower case letters and umlauts.

Note DE 0008:

The address for reverse routing is provided by the interchange sender to inform the interchange recipient of the address within the sender's (source) system to which responding interchanges must be sent. It is recommended that the GLN be used for this purpose.

Note DE 0014:

The routing address is used to identify the receiver, if a provider adds service values for the actual receiver (e.g. consolidated companies, corporate group). The use of the identification system (e.g. GLN) has to be agreed bilaterally.

Note DE 0020:

This data element must contain a consistent sequential number per interchange between sender and receiver of the transmission.

Note DE 0032: This data element is used to identify any underlying agreements which control the exchange of data. Within EANCOM, the identity of such agreements must start with the letters 'EANCOM', the remaining characters within the data element being filled according to bilateral agreements.

Example:

4 UNB+UNOC:3+4012345000009:14:4012345000018+4000004000002:14:4000004000099+101013:10
3+4711+REF:AA++++EANCOM+1'
The EANCOM file 4711 dated 13.10.2010, 10 h 43 is sent by the issuer identified with GLN 4012345000009 to the receiver identified with GLN 4000004000002.

		EDIFACT	EAN	*	GER	Description:
3139	Contact function code	C an..3	R			PD = Purchasing contact
C056	DEPARTMENT OR EMPLOYEE DETAILS	C	O			
3413	Department or employee name code	C an..17	O			
3412	Department or employee name	C an..35	O			Contact person at corporate office
Segment notes: Segmentstatus: Conditional This segment is used to identify the department and/or person within the party specified in the NAD. The GLN is particularly suitable for that purpose. Example: CTA+PD+:R.Waldorf' Purchasing contact person is Mr. Waldorf.						

7. EANCOM® Segments Layout

Heading section

Segment number: 13

SG2	- M	5 - NAD-SG3-SG4				
SG4	- C	9 - RFF				
RFF	- M	1 - Reference				
Description: To specify a reference.						
		EDIFACT	EAN	*	GER	Description:
C506	REFERENCE	M	M			
1153	Reference code qualifier	M an..3	M			IT = Internal customer number
1154	Reference identifier	C an..70	R			Internal customer number of corporate office
Segment notes: Segmentstatus: Conditional						
The RFF segment following the NAD segment can specify the customer number of suppliers system.						
If no functional or organisational differences are necessary within one company only the GLN is used for communication purposes, if applicable the receiver links within the inhouse system. Additional identifications should be agreed only in those cases when different functional entities need to be distinguished at one location.						
Example: RFF+IT:1515-234-4'						
The internal customer number of the sender is 1515-234-4 in the receivers system.

Heading section

Segment number: 14

SG5	- C	5 - CUX				
CUX	- M	1 - Currencies				
Description:						
To specify currencies used in the transaction and relevant details for the rate of exchange.						
			EDIFACT	EAN	*	GER
						Description:
C504	CURRENCY DETAILS	C		R		
6347	Currency usage code qualifier	M an..3		M	*	2 = Reference currency
6345	Currency identification code	C an..3		R		Currency ISO 4217 three alpha EUR = Euro
6343	Currency type code qualifier	C an..3		R		11 = Payment currency
C504	CURRENCY DETAILS	C		D		
6347	Currency usage code qualifier	M an..3		M	*	3 = Target currency
6345	Currency identification code	C an..3		R		ISO 4217 three alpha
6343	Currency type code qualifier	C an..3		R		11 = Payment currency
6348	Currency rate value	C n..4		O		
5402	Currency exchange rate	C n..12		D		Rate of exchange
Segment notes:						
Segmentstatus: Depending, must only be used if prices or amounts are content of the message.						
When specifying Reference and Target Currencies for international trade, one occurrence of CUX is all that is required. The reference currency is identified in the first occurrence of composite C504, with the target currency specified in the second occurrence of C504. The rate of exchange between the two is detailed in DE 5402.						
Example: CUX+2:EUR:11+3:USD:11+0.90243' The basic currency is EURO.

Segment number: 15

SG6	- C	200000	- LOC-DTM-SG8			
LOC	- M	1	- Place/location identification			
Description: To identify a place or a location and/or related locations.						
		EDIFACT	EAN	*	GER	Description:
3227	Location function code qualifier	M an..3	M			162 = Place or location of sale
C517	LOCATION IDENTIFICATION	C	A			
3225	Location name code	C an..25	A			Identification of location of sale Global Location Number (GLN)- Format n13
1131	Code list identification code	C an..17	O			
3055	Code list responsible agency code	C an..3	D			9 = GS1
Segment notes: Segmentstatus: Mandatory The LOC segment triggers the detail section of the message. Segment group 6 is repeated for every location where sales are reported. The outlet for which sales data are reported is identified by GLN. Example: LOC+162+5099104000221::9' The outlet is identified by GLN 5099104000221.						

7. EANCOM® Segments Layout

Detail section

Segment number: 16

SG6	- C	200000	- LOC-DTM-SG8				
DTM	- C	5	- Date/time/period				
Description: To specify date, and/or time, or period.							
				EDIFACT	EAN	*	GER
C507	DATE/TIME/PERIOD	M		M			
2005	Date or time or period function code qualifier	M an..3		M	*		356 = Sales date, and or time, and or period
2380	Date or time or period value	C an..35		R			Sales period outlet
2379	Date or time or period format code	C an..3		R			102 = CCYYMMDD 203 = CCYYMMDDHHMM 718 = CCYYMMDD-CCYYMMDD Format of period to be given in actual message without hyphen.
Segment notes: Segmentstatus: Conditional							
The segment is used to provide a date or period when goods have been sold, which are identified in the following LIN group (segment group 8). The DTM segment can be used to specify the weekly sales in a monthly report. This segment is not necessary if the date or period is identical with the specification at header level.							
Example: DTM+356:20030601:102' The date of sale is 01.06.2003.

6411	Measurement unit code	C an..3	D			KGM = kilogram KWT = kilowatt For more code see EANCOM codeslist.
Segment notes: Segmentstatus: Mandatory						
The QTY segment is used to specify the quantity by the consumer for the current item, which was identified in the LIN segment.						
DE 6411 is only used, if the article is a variable quantity article. Default value is piece.						
Example: QTY+210:2' The quantity returned by the consumer is 2.						

7. EANCOM® Segments Layout

End of message

Segment number: 22

UNS - M 1 - Section control						
Description: To separate header, detail and summary sections of a message.						
Notes: 1. To be used by message designers when required to avoid ambiguities. Mandatory only if specified for the type of message concerned.						
		EDIFACT	EAN	*	GER	Description:
0081	Section identification	M a1	M			S = Detail/summary section separation
Segment notes: Segmentstatus: Mandatory This segment is used to identify the break between the message detail and message trailer sections. Example: UNS+S' Separation of detail- and summary section						

7. EANCOM® Segments Layout

End of message

Segment number: 23

UNT - M 1 - Message trailer						
Description: To end and check the completeness of a message.						
		EDIFACT	EAN	*	GER	Description:
0074	Number of segments in the message	M n..6	M			Number of segments within the message
0062	Message reference number	M an..14	M			The message reference numbered detailed here must equal the one specified in DE 0062 of the UNH segment.
Segment notes: Segmentstatus: Mandatory This segment is mandatory in UN/EDIFACT. It must always be the last segment in the message. Example: UNT+35+ME000001' The message contains 35 segments						

7. EANCOM® Segments Layout

Segment number: 24

UNZ - M 1 - Interchange trailer						
Description: To end and check the completeness of an interchange.						
		EDIFACT	EAN	*	GER	Description:
0036	Interchange control count	M n..6	M			End of the transmission file, Number of messages or message groups Number of messages or message groups in the transmission file.
0020	Interchange control reference	M an..14	M			Interchange control reference, end Interchange control reference, identical with UNB DE 0020.
Segment notes: The UNZ segment is the last segment of the transmission file. Note DE 0036: If functional groups are not used, this is the number of messages within the interchange. Example: UNZ+1+4711' The transmission file contains 1 message.						

8. Example(s)

SLSRPT message example

Please note that EANCOM® 2002 message examples are intended to describe all possible constellations of segment use. They do not necessarily reflect the actual requirements of a business process.

Please also note that for technical reasons the examples can contain component data element separators, which would normally be represented as data element separators in original messages.

8. Example(s)

UNA:+.?'

The UNA segment contains the default service string characters.

UNB+UNOC:3+4012345000009:14:4012345000018+4000004000002:14:4000004000099+101013:1043+4711+REF:AA++++EANCOM+1'

The EANCOM file 4711 dated 13.10.2010, 10 h 43 is sent by the issuer identified with GLN 4012345000009 to the receiver identified with GLN 4000004000002.

UNH+ME000001+SLSRPT:D:01B:UN:EAN007'

The reference number of the SLSRPT message is ME000001.

BGM+73E::9:X+87441+9'

The document number is 87441.

DTM+137:20031001:102'

The message was created on 01.10.2003

DTM+90:20031201:102'

01.12.2003 is the start date of the reporting period.

DTM+91:20031204:102'

04.12.2003 is the end date of the reporting period.

DTM+356:2003080120030830:718'

The reporting period is 01.08.2003 to 30.08.2003.

NAD+SU+4089876511111::9'

The supplier is identified by GLN 4089876511111.

NAD+BY+4071615111110::9+X:X:X:X'

The buyer/message sender is identified by GLN 4071615111110.

RFF+GN:HRB-471111'

German statements on business letters: HRB-471111

CUX+2:EUR:11+3:USD:11+0.90243'

The basic currency is EURO.

LOC+162+5099104000221::9'

The outlet is identified by GLN 5099104000221.

DTM+356:20030601:102'

The date of sale is 01.06.2003.

LIN+1++4056786542381:SRV'

The product for that sales are being reported is identified by GTIN 4056786542381.

MOA+203:134.5'

The line amount is 134,50.

PRI+1E:12.45::RTP'

The retail price is 12,45.

QTY+153:24'

The current sold quantity is 24.

8. Example(s)

QTY+210:2'

The quantity returned by the consumer is 2.

UNS+S'

Separation of detail- and summary section

UNT+35+ME000001'

The message contains 35 segments

UNZ+1+4711'

The transmission file contains 1 message.
